

## *Training for our future*

---

**We are on a mission to invest back into our people's career progression, to build a workforce that will enable us to grow and create more opportunities for everyone across our company.**

Commencing 2022 we are embarking on a company-wide training initiative. The training will be guided by our Leadership team, who will take part in this journey to ensure staff are supported. The training is an investment in you. It will be done on the job and you will receive a Nationally Accredited Qualification.

*Great people to work for, great people to work with, great people to deal with.*

**Lite n' Easy**
